Projects

Discount Monkey

- Product price-comparing service designed to help users find the best deals on products and be notified of discounts in the future
- Responsive frontend designed using **React** and **Bootstrap**
- Backend is a **RESTful API** built with **Node** and **Express**, **MongoDB** was used to store user data
- Encrypted passwords using **bcrypt**. Authenticated with **PassportJS** using **JSON web tokens**

Premier Prophet - NewHacks 2020 2nd Place

- Machine learning model to predict football matches via **TensorFlow** and **Keras** on **Heroku**
- Constructed a responsive **HTML/CSS** and **Bootstrap** frontend and **Flask** and **Python** backend
- Made accurate predications by using data from API calls to teach the model

Anime Monkey

- Chrome extension that sets reminders and helps users find recent airing anime episodes according to the user's myanimelist.com current watchlist
- Uses **Bootstrap** to create a clean UI for users
- Uses **Javascript** and **AJAX** requests to the [myanimelist](https://myanimelist.com) API
